## **Test Case-39**

Test Name: RJIL-IP-QA-DS-SYS-040

**Test Objective:** To check support for password encryption.

## **Test Configuration:**

Service password-encryption

!

## Test Set up (Including Pre requisites): Switch , ECR1,ECR2

**Procedure:** Connect Switch to the ECR1, ECR2

Action: Response:

|  | Service password encryption |   | Switch    | should | support | password |
|--|-----------------------------|---|-----------|--------|---------|----------|
| 1  |                             | 1 | encryptio | on     |         |          |
| Expected Result: Switch should support password encryption |                             |   |           |        |         |          |
|  |                             |   |           |        |         |          |
| Actual Result:   |                             |   |           |        |         |          |
| Current configuration:                                     |                             |   |           |        |         |          |
| · ·  |                             |   |           |        |         |          |
| username admin password 7 052F304A403F                     |                             |   |           |        |         |          |
